

# BITE REGISTRATION MADE EASY – **FUTAR®**

**A-SILICONE FOR BITE REGISTRATIONS**

**KETTENBACHDENTAL**

Simply intelligent

# **FUTAR® –** **SIMPLY IMPRESSIVE!**

## **Bite registration**

The **Futar®** product family includes eight different bite registration materials based on A-silicone for creating accurate occlusal records.

### **SUPER IN QUALITY**

- For accurate occlusal registrations

### **SUPER THROUGH VERSATILITY**

- Choose between high and highest final hardness, in addition to different processing times!

### **SUPER IN RELIABILITY AND CONTINUITY**

- Tried and tested many times with always reliable quality

**Do not make compromises with your bite registration!**

# FUTAR® – THE ADVANTAGES AT A GLANCE

## Futar® / Futar® Fast:

- High final hardness (Shore-A 90)
- Flexible in processing: easy to cut
- Also available with fast-setting characteristics for more patient comfort!

## Futar® Easy / Futar® Easy Fast:

- High final hardness (Shore-A 90)
- Low bite resistance
- Flexible in processing: easy to cut
- Also available with fast-setting characteristics
- Low dispensing force – easy to apply

The Futar® family can  
do even more:

## Futar® D / Futar® D Fast:

- Extra high final hardness (Shore-D 43)
- Offers very good millability
- Also available with fast-setting characteristics: for more patient comfort!

## Futar® Clear Fast:

- No risk of fracture caused by comfortable final hardness (Shore-A 62)
- Enables direct visual control of the correct bite

## Futar® D Slow:

- Extra high final hardness (Shore-D 43)
- Extra long processing time for time-consuming applications, e.g. for myocentric bite registration, fixation of impression posts or individual contouring of the margins
- Versatile use also in the laboratory

- Accurate results thanks to excellent flow properties
- Low elasticity reduces springiness in the model assignment
- Surplus can be broken off easily

**SIMPLE,  
CLEAN AND  
FAST TO USE!**

# FUTAR® – PERFORMANCE RUNS IN THE FAMILY

## Dental arch

 Bite registration material	 Mixing	 Working time at 23 °C/74 °F ≤	 Intraoral setting time at 35 °C/95 °F ≥	 Total setting time <sup>2)</sup> ≥	 Hardness (approx.) Shore
<b>Futar®</b>		30 sec.	90 sec.	<b>2:00 min.</b>	A 90

## DR. TOM BEREZNICKI ON FUTAR®

Since I graduated in 1976, we came a long way in the material we used for bite registration. 16 years ago, I have been introduced to FUTAR® and been using ever since. It's the most accurate material to me and offers the right degree of strength not to break on removal from the mouth nor when placed on the working casts. The transfer of information from the mouth to the articulator is more accurate than with similar materials I used.
